- ▶ Easy financing

Selco customises home lighting systems as per energy requirement of the client. It also has standard home lighting solutions starting from 1 – 10 lights and fans.

SELCO

SELCO, since its beginning in 1994 has provided reliable solar and electricity services in the rural areas of South India. At the very core of SELCO's philosophy is its mission to link those who lack access to energy services with appropriate technology, financing, and efficient service. Since inception, SELCO has built on this holistic package to provide reliable energy services not only to rural homes but also to small-scale business, street vendors, micro enterprises and institutions. SELCO provides service through its own dedicated service centres and staff.

SELCO has been recognised for its service through several Indian and international awards such as the Ashden Awards in 2005 & 2007, as a TECH Museum Laureate in 2005 and the Social Entrepreneur of the Year Award. However, our greatest achievement has been the smile on the faces of our 85,000 customers.
